

SAFETY FIELD TECHNICIAN

Location: Austin, TX area

Hours: M-F 7am – 5:30pm and Saturday as needed

H.L. Chapman Pipeline Construction, Inc. is looking for a **FIELD TECHNICIAN** within our safety department. The primary function of the field safety technician is to monitor and implement the organization's health and safety policy; ensure that the field jobsites are in compliance with our safety policies and procedures; and to reduce or prevent hazards, dangers and accidents.

Typical Tasks include:

- Ensure the health and safety of the workers, but also of the jobsite, environment, and general public.
- Inspect the jobsites and identify potential hazards, assess the risks, and report potential hazards and take appropriate action.
- Investigate incidents to identify their causes and find ways to prevent them in the future.
- Effectively communicate and collaborate with manager to ensure safety strategies and programs align with corporate expectations and policies.
- Assist in the response and investigations of significant safety events, such as serious injury or illness, fatalities, regulatory action, etc.
- Proactively recommend changes to protect workers and educate employees on how to prevent health and safety incidents using safety training programs.
- Schedule job-site visits and safety audits.
- Support Safety Training Department with on-site and classroom training to maintain corporate expectations.

Requirements:

- Ability to travel 90-95% of the week, including overnight travel to various locations.
- Will maintain specified certifications, including, but not limited to OSHA, CPR/Basic First Aid, etc.
- Demonstrate knowledge of safety rules and regulations at all levels of government, including federal, state, and local.
- Ability to maintain and practice workplace safety programs, procedures and policies.
- Good interpersonal, customer service and communication skills with all levels within the organization.
- Able to work independently and as part of a team.
- Strategize with safety team to support and drive a culture that embraces safety, recognizes hazards and takes action to minimize risk.
- Ability to organize and manage multiple tasks and initiatives simultaneously.
- Basic knowledge of computer skills.
- Must be able to pass a background history and agree to pre-employment and random drug testing
